# Ada and SPARK

- Designed for Safety and Security
- Powerful means of specification
- Strong type checking
- Object Oriented Programming
- Concurrent programming features, including support for multicore
- Generic templates
- Encapsulation
- Hierarchical program composition / programming-in-the-large

# Specifications

```
type Power is range 0 .. 100;

procedure Set_Motor_Power (P : Power);
--  Set desired power for the motor
```

## Resources and Performances

Comparable to C/C++ for the same level of features:

- Do you need exceptions?
- Do you need Object Oriented Programming?
- Do you need an RTOS?
- Do you need run-time checks?

# Supported Platforms

- ARM Cortex-A
- ARM Cortex-R
- ARM Cortex-M
- PowerPC 32 and 64
- x86 and x86-64
- SPARC
- RISC-V
- and more...

# Ravenscar Tasking

A.K.A There's a mini-RTOS in my language<sup>1</sup>

- Tasks (threads)
- Time handling
  - Clock
  - Delays
- Protected Objects:
  - Mutual exclusion
  - Synchronization between tasks
  - Interrupt handling

---

<sup>1</sup>[blog.adacore.com/theres-a-mini-rtos-in-my-language](http://blog.adacore.com/theres-a-mini-rtos-in-my-language)

# Hardware mapping

```
-- High level view of the type
type Power is range 0 .. 100

-- Hardware representation of the type
with Size      => 8,
     Alignment => 16;
```

# Interfacing with C / Assembly

```
with Interfaces.C; use Interfaces.C;

[...]

function My_C_Function (A : int) return int;
pragma Import (C, My_C_Function, "my_c_function");

function My_Ada_Function (A : int) return int;
pragma Export (C, My_Ada_Function, "my_ada_function");
```

## Getting started demo

---

# Download and install the tools: [adacore.com/community](http://adacore.com/community)

## Download GNAT Community Edition

For free software developers, hobbyists, and students.

### x86-64 GNU Linux (64 bits)

#### GNAT GPL Ada

# Download Ada Drivers Library

This screenshot shows the GitHub repository page for AdaCore/Ada\_Drivers\_Library. The page includes a header with navigation links like 'Pull requests', 'Issues', 'Marketplace', and 'Explore'. Below the header, there's a summary bar with metrics: 1,179 commits, 22 branches, 0 releases, 15 contributors, and BSD-3-Clause license. A main list of files and their descriptions is shown, along with a 'Clone or download' section containing 'Clone with HTTPS' and 'Use SSH' options, and a 'Download ZIP' button.

Ada source code and complete sample GNAT projects for selected bare-board platforms supported by GNAT.

File	Description	Last Commit
.gitignore	Use new GPRbuild attribute: Create_Missing_Dirs	7 months ago
boards	robust, safer version of GPIO_PIO	5 months ago
components	SGTL5000: Fix some typos	3 months ago
docs	docs/filesystem.md: Add doc for directory handling	3 months ago
examples	Examples: Bring back the blinky and serial examples for the STM32F4 d...	2 months ago
hal	HAL.SDMMC: Add single and multiple block write cmd definition	5 months ago
middleware	File_IO: Improve error handling	2 months ago
scripts	Examples: Bring back the blinky and serial examples for the STM32F4 d...	2 months ago
testsuite	Monitor.Block_Drivers: Show data size	5 months ago
arch	add convenience routine to conditionally clear a pin	5 months ago
pat-rogers	Merge pull request #129 from AdaCore/add_gpio_drive ...	3 months ago

**Clone with HTTPS** Use SSH  
Use Git or checkout with SVN using the web URL.

**Download ZIP**

## The Make with Ada Competition

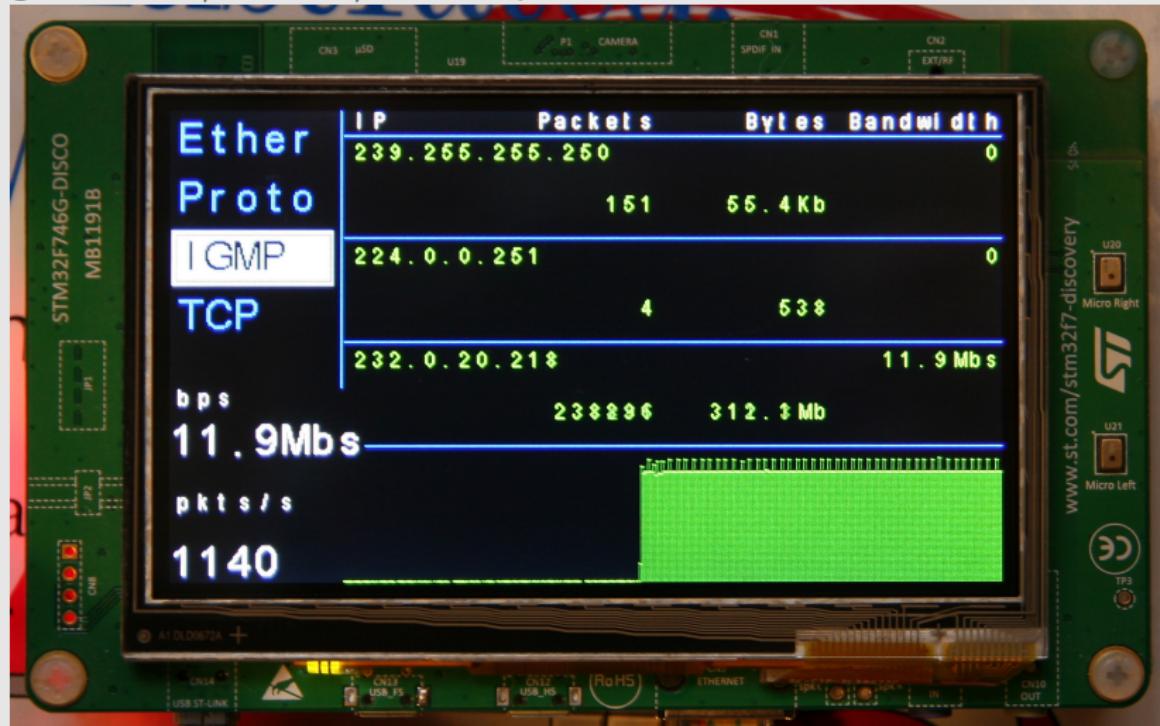

- Embedded software project competition
- Open to everyone
- ~8000 euros in prize
- [makewithada.org](http://makewithada.org) (Twitter @adaprogrammers)

**MAKE***with***Ada**

The logo consists of the word "MAKE" in a large, bold, black sans-serif font. To the right of "MAKE", the word "with" is written in a smaller, italicized, black font. Following "with", the word "Ada" is also in a large, bold, black sans-serif font. A unique feature of the "MAKE" portion is that each letter is intersected by a vertical bar of a different color: the 'M' has a blue bar, the 'A' has a green bar, the 'K' has an orange bar, and the 'E' has a pink bar.
